

Computer Job Search Project

Directions: Find a computer-related job that you would desire if you were interested in pursuing a career in the computer industry. Using word processing software (such as Microsoft Word), prepare a report. Your report should include the following information:

1. Name of the occupation
2. An example of a company which would employ someone working in your chosen occupation
3. Based on the occupation, share what skills are needed for the occupation. Use the *Occupational Outlook Handbook* to obtain information regarding the skills needed.
4. Provide the names of at least three colleges that prepare students with the necessary education for your chosen occupation. Try to find at least one college in Georgia. Access the GeorgiaCollege411 website to obtain college information. Share what type of degree or certification is needed for the job.
5. Provide information on the salary range for the job. The *Occupational Outlook Handbook* will provide salary information.
6. Provide information on the job outlook. Use the *Occupational Outlook Handbook* to obtain information regarding the future outlook of the career.
7. Provide IT credentials such as certifications required for the occupation
8. Describe how computing enhances traditional careers and enables new careers.

Upload the completed report.

Note: Reports should be typed, Times New Roman, double space, no bigger than 12 pt font, use paragraphs with proper spelling and grammar. MLA format.
