

Cloud Comparison

IT~IDT~5: Understand, communicate, and adapt to a digital world.

Purpose: To have the students learn about the various features of cloud computing and to provide them with the knowledge of how to choose an appropriate cloud service.

Resources: The students will utilize their various searching techniques to gain the information online.

Instructions: Using the PowerPoint and the Internet, create a comparison of the features of three different cloud computing providers. Compare the following items on each of the providers you look at to compare. You need to add a few items of your own to the list! This should simply get you **started!** Please also include a definition of Cloud Computing somewhere on your page!

You choose which software you want to do your comparison with (Word, Excel, PowerPoint, or Prezi) **You must also include a picture (icon) of each of the providers!** ☺ Please note, you are also ranking the cloud computing providers as well as providing actual customer reviews that you find online!

Price Comparison
